

Step 1: Figma Mockup

1. **Examine the fonts, colors, layout and sizes**
 2. **Export Assets:**
 - Export images (e.g., PNG, JPEG, SVG) from Figma in web-ready formats.
 - Note the design dimensions and typography styles for accurate replication.
-

Step 2: Set Up WordPress and Elementor

1. **Install WordPress:**
 - Create and install WordPress in local server
 - Set up a Astra theme
 2. **Install Elementor:**
 - Go to the WordPress dashboard.
 - Navigate to **Plugins > Add New**, search for **Elementor**, and install it.
 3. **Install Elementor header and footer and testimonial plugin**
-

Step 3: Create a Homepage

1. Navigate to **Pages > Add New** in the WordPress dashboard.
 2. Title your page and click **Edit with Elementor**.
 3. This opens the Elementor editor, providing a drag-and-drop interface.
-

Step 4: Configure Global Settings

1. **Set Site-Wide Styles:**
 - Click the hamburger menu (top-left corner) in Elementor.
 - Go to **Site Settings** and define global fonts, colors, and other design tokens matching your Figma design.
 2. **Set Page Layout:**
 - In the Elementor editor, select **Settings (gear icon)** at the bottom-left corner.
 - Choose a blank or full-width layout.
-

Step 5: Recreate the Design in Elementor

1. **Structure the Layout:**

- Use Elementor's **header and footer plugin to create the header and footer**
 - Use Elementor builder to create the body
 - Customize each widget's style (font size, colors, spacing) to match the mockup.
-

Step 6: Import and Add Assets

1. Upload exported assets from Figma to the WordPress **Media Library**.
 2. Replace placeholder images and icons in Elementor with your assets.
 3. Use **Typography** settings to match the fonts from Figma.
-

Step 7: Fine-Tune and Test

1. **Preview Responsiveness:**
 - Use Elementor's responsive editing tools to adjust the layout for mobile and tablet views.
 2. **Test Functionality:**
 - Ensure all buttons, forms, and links work as expected.
 3. **Cross-Browser Testing:**
 - Check the page on multiple browsers to ensure consistency.
-

Step 8: Publish the Page

1. Once satisfied with the page, click **Publish** in Elementor.
 2. Preview the live page to confirm everything looks as intended.
-
